

TECHNICAL REQUIREMENTS

ROHIT BHARGAVA

Rohit typically requires a professional quality lavalier microphone with lapel clip. He may use both audio and visual collateral and will notify the Client accordingly. Client will provide a wireless remote clicker in order to advance visuals. Presentations can be tailored for either 4:3 or 16:9 ratios – depending on the Client’s setup for the event.

Stage Setup

Stage needs to be clear of all items, furniture and props unless otherwise agreed. Podiums cannot remain in the middle of the stage during Rohit’s presentation. Podiums should be cleared off the stage. If that is not possible, all podiums must be moved to either side of the stage. Rohit does not use a podium during presentation. If the event is being held during (or a part of a meal), it is preferable that all dishes are cleared, food consumption over and wait staff is not setting up (or removing) dishes during presentation.
